Eco Pregnancy Test

Eco Pregnancy Test Details

- A midstream test, each test is 15cm long by 1.4cm wide
- The tests are over 99% accurate (the same as leading brands)
- The tests are 99% plastic free
- The tests are made from 99% paper
- Test sensitivity is 25mIU/ml
- Users can test up to 5 days before the day of their period
- Results show in 5-10 minutes depending on how diluted the urine is
- Recommended by doctors
- The tests are easy to write on to record test time & day

Sustainability Credentials

- The pouch the test comes in is made from a bioplastic that is compostable
- The paper used in the tests is from responsible forestry (ie trees are replanted for ones cut down)
- Cut the test in half after use and recycle in paper recycling the piece you hold, items with body fluids on them can't be recycled
- Plastic pregnancy tests take 30+ years to breakdown in landfill (then they turn into micro plastics), paper takes 6-8 weeks
- Over 12 million plastic tests a year go into landfill in UK - approximately 120,000kg of plastic
- If the test is thrown in the bin they take up less space in landfill than the plastic tests

Regulatory Approvals

- CE certification
- Registered with the MHRA in UK

Manufacturing

- The tests are manufactured in China
- When manufactured the tests have a 3 year shelf life
